

Mrs Fryer

Anning (Year 3)

About me...

I have been teaching for nearly 20 years and I have 3 young boys of my own!

I love teaching Science, particularly investigations as we have such an amazing Science laboratory called the 'Phiz Lab'.

Something to look forward to in Year 3...

We teach through topics and my favourite is 'World Explorer'.

We visit many places like Birmingham Airport and the Transport Museum.

Our Junior School have a 'house' system based on four Saints (Aidan, Alban, Bede, Columba) and you gain house points for excellent work and behaviour. Fortnightly, house points are collected and the winning house announced!

You can bring in your own pencil case and equipment to use in class!

I enjoy teaching because...

I find it very rewarding and enjoy working with young people. I hope to make a difference to others by sharing my knowledge and to be inspiring.

My top tips for Year 3...

- The harder you work, the more house points you receive!
- Be a role model to others by following our school values.
- Be involved in all areas of school life: after school clubs, member of Worship Committee, Class Councillor or Eco-Warrior.
- Remember to bring your reading and homework diaries each day!
