

Name: Miss Willmott

Class: Hawking (Year 5)

#### About me...

I **LOVE** the colour purple and my favourite animals are penguins...I have several cuddly and garden model penguin friends at home! I enjoy crafts and, when I have time, I make my own cards and scrapbooks for gifts.

#### Let's get excited about September!

I am really looking forward to studying the Ancient Egyptians and continuing our studies of History where we learn what happened after the Romans invaded and left Britain. I am really excited about the educational visits that we are hoping to organise to help us with our learning. One of the topics we study in Science is forces which is something different that we haven't learnt about in Year 4 and I do love the practical work that I know we can do in this unit of work! I know I have worked with lots of you before during home learning and in Curie class but I am so excited to get to know those children who I don't know so well and think we will have a really great year in Year 5 together!

#### Why I love being a teacher:

Every day as a teacher is different and I really enjoy getting to know each member of my class and helping them to learn. What we teach is updated quite regularly so that means I am always learning too and thinking about different ways to teach interesting and exciting lessons. I love to help others and would like to think that if members of my class had a problem, they would feel able to come and talk to me about it.

#### Top tips for Year 5:

Try to be organised: use your homework diary to record routines for handing in homework, homework diaries and reading records.

Always ask if you are unsure of anything - you don't have to ask in front of the class if you prefer not to.

Read as often as you can - if you are not keen on reading, we can help you to find something you will like.

We are hoping that we are all confident with our times tables but if you know there are some you need to practise - this will really help!
